

J SERIES POLY

Available In: 10 ft - 11 ft - 12 ft
moldboard lengths

Heavy Duty Power Reverse Trip Edge Design Features:

- 39" tall 3/8" thick polymer moldboard for weight reduction and minimize snow build-up.
- 3 1/2" x 16" SA reversing cylinders with push frame mounted cushion valve protection.
- (3) 5/8" x 8" sectional cutting edges allowing independent tripping action to clear all obstructions and adjust to any road surface condition.
- (6) torsion trip springs cushion the tripping action of the cutting edges there-by reducing damage to vehicle and equipment.
- (10) 3/8" thick vertical moldboard ribs.
- 4" x 4" x 3/8" heavy duty tubular push frame assembly.
- (4) 1 3/8" thick moldboard to push frame attachment lugs.
- Integral design curb shoes.
