VCL 2 Stage Plow

Patent Pending

Air down pressure applied to the second blade allows it to follow contours, cross-fall elevations, and wheel rutting!

“The more snow you remove mechanically, the less salt required!”

The Viking-Cives 2 Stage plow gives you all of the advantages of the Viking-Cives one-way plow with the ability to scrape the roadway clear of ice and snow with one pass. The spring steel individual carbide scraper teeth **remove much of the snow traditionally left by a plow**. The result is the application of **less chlorides** required.

Your road will melt off faster and your entire **road system will be safer** using the Viking-Cives 2 Stage plow.

This plow is easily adapted to most trucks; use as a standard plow or with the second blade deployed.
