Viking Salt Saver Underbody Plow

The Viking underbody Salt Saver is the first machine that plows AND scrapes while following the contour of the road.

The patented flat tine design allows the sectional moldboard to reach deep into wheel ruts and uneven surfaces for maximum snow removal.

As more snow is removed mechanically, less chemical is required to obtain a bare and safe driving surface. With regular use of the salt saver underbody plow, build up on your streets is greatly reduced.

Model	Number of Tines	Clearing Path	Attack Angle	Approximate weight	Down Pressure
VCL UB1082S	32 plus Trip Section	9'	30 degrees	743 lbs.	2000 lbs @ 1000 PSI hydraulic pressure
