

THE "SALT-SAVER" UNDERBODY FINGER PLOW

The Viking underbody finger plow is the first machine that plows AND scrapes while following the contour of the road. The patented flat tine design allows the sectional moldboard to reach deep into wheel ruts and uneven surfaces for maximum snow removal. As more snow is removed mechanically, less chemical is required to obtain a bare and safe driving surface, making this product environmentally friendly. With regular use of the underbody finger plow, build up on your streets is greatly reduced.

"LESS SALT, LESS SNOWPACK, LESS COST"

Model	Number of Tines	Clearing Path	Attack Angle	Approx. Weight	Down Pressure
VCLUB11FL	32 plus Trip Section	9'	30 degrees	743 lbs.	2000 lbs. @ 1000 PSI hydraulic pressure
