# HIGH SPEED HEAVY DUTY ONE WAY PLOW

Standard 8 gauge paneled moldboard with (8) 1/2" thick full length one piece ribs provide strength and rigidity.

Adjustable stabilizing arm determines the moldboard's precise angle for maximum cutting edge efficiency in any winter condition. Stabilizing brace also effectively transmits force to the pushframe for added leverage during plowing.

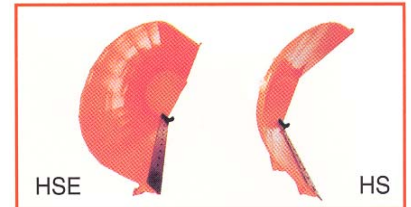

Two adjustable shoe brackets permit use of either center or top punched cutting edges. The two shoes provide required pushframe support.

The pushframe is tubular construction with a 6" x 6" x 1/2" boxed main drive angle and 5" x 5" x 1/4" tubular truss members. This provides a light, yet rugged design.

Oscillating push lugs permit the moldboard to follow road contours without putting excess strain on the truck chassis.

Compression springs and (3) 45° slotted trip lugs allow independent moldboard movement. This design gives proper tripping action at all plowing speeds, without dumping snow on cleared paths. Trip springs are adjustable. To prevent major plow damage, tripping action is shear pin protected in the stabilizing arm when major obstructions are hit. Viking-Cives tripping action is designed for easy accessibility, and maintenance free performance.

## SPECIFICATIONS

MODEL #	OVERALL LENGTH	CLEARING WIDTH	CUTTING EDGE	NOSE HEIGHT	DISCHARGE HEIGHT	NUMBER RIBS	WEIGHT (PLOW & P/F)
2654HS 9	13' 2"	9'	11' 4"	26"	54"	8-1/2"	1950#
2654HSE 9	13' 10"	9'	11' 4"	26"	54"	8-1/2"	2000#
2656HS 10	14' 9"	10'	12' 4"	26"	56"	8-1/2"	2000#
2656HSE 10	14' 9"	10'	12' 4"	26"	56"	8-1/2"	2060#
